Luke

Leku's family is the family that has been responsible for making clouds for our planet since forever, they have their own secret formulas that only family members know.

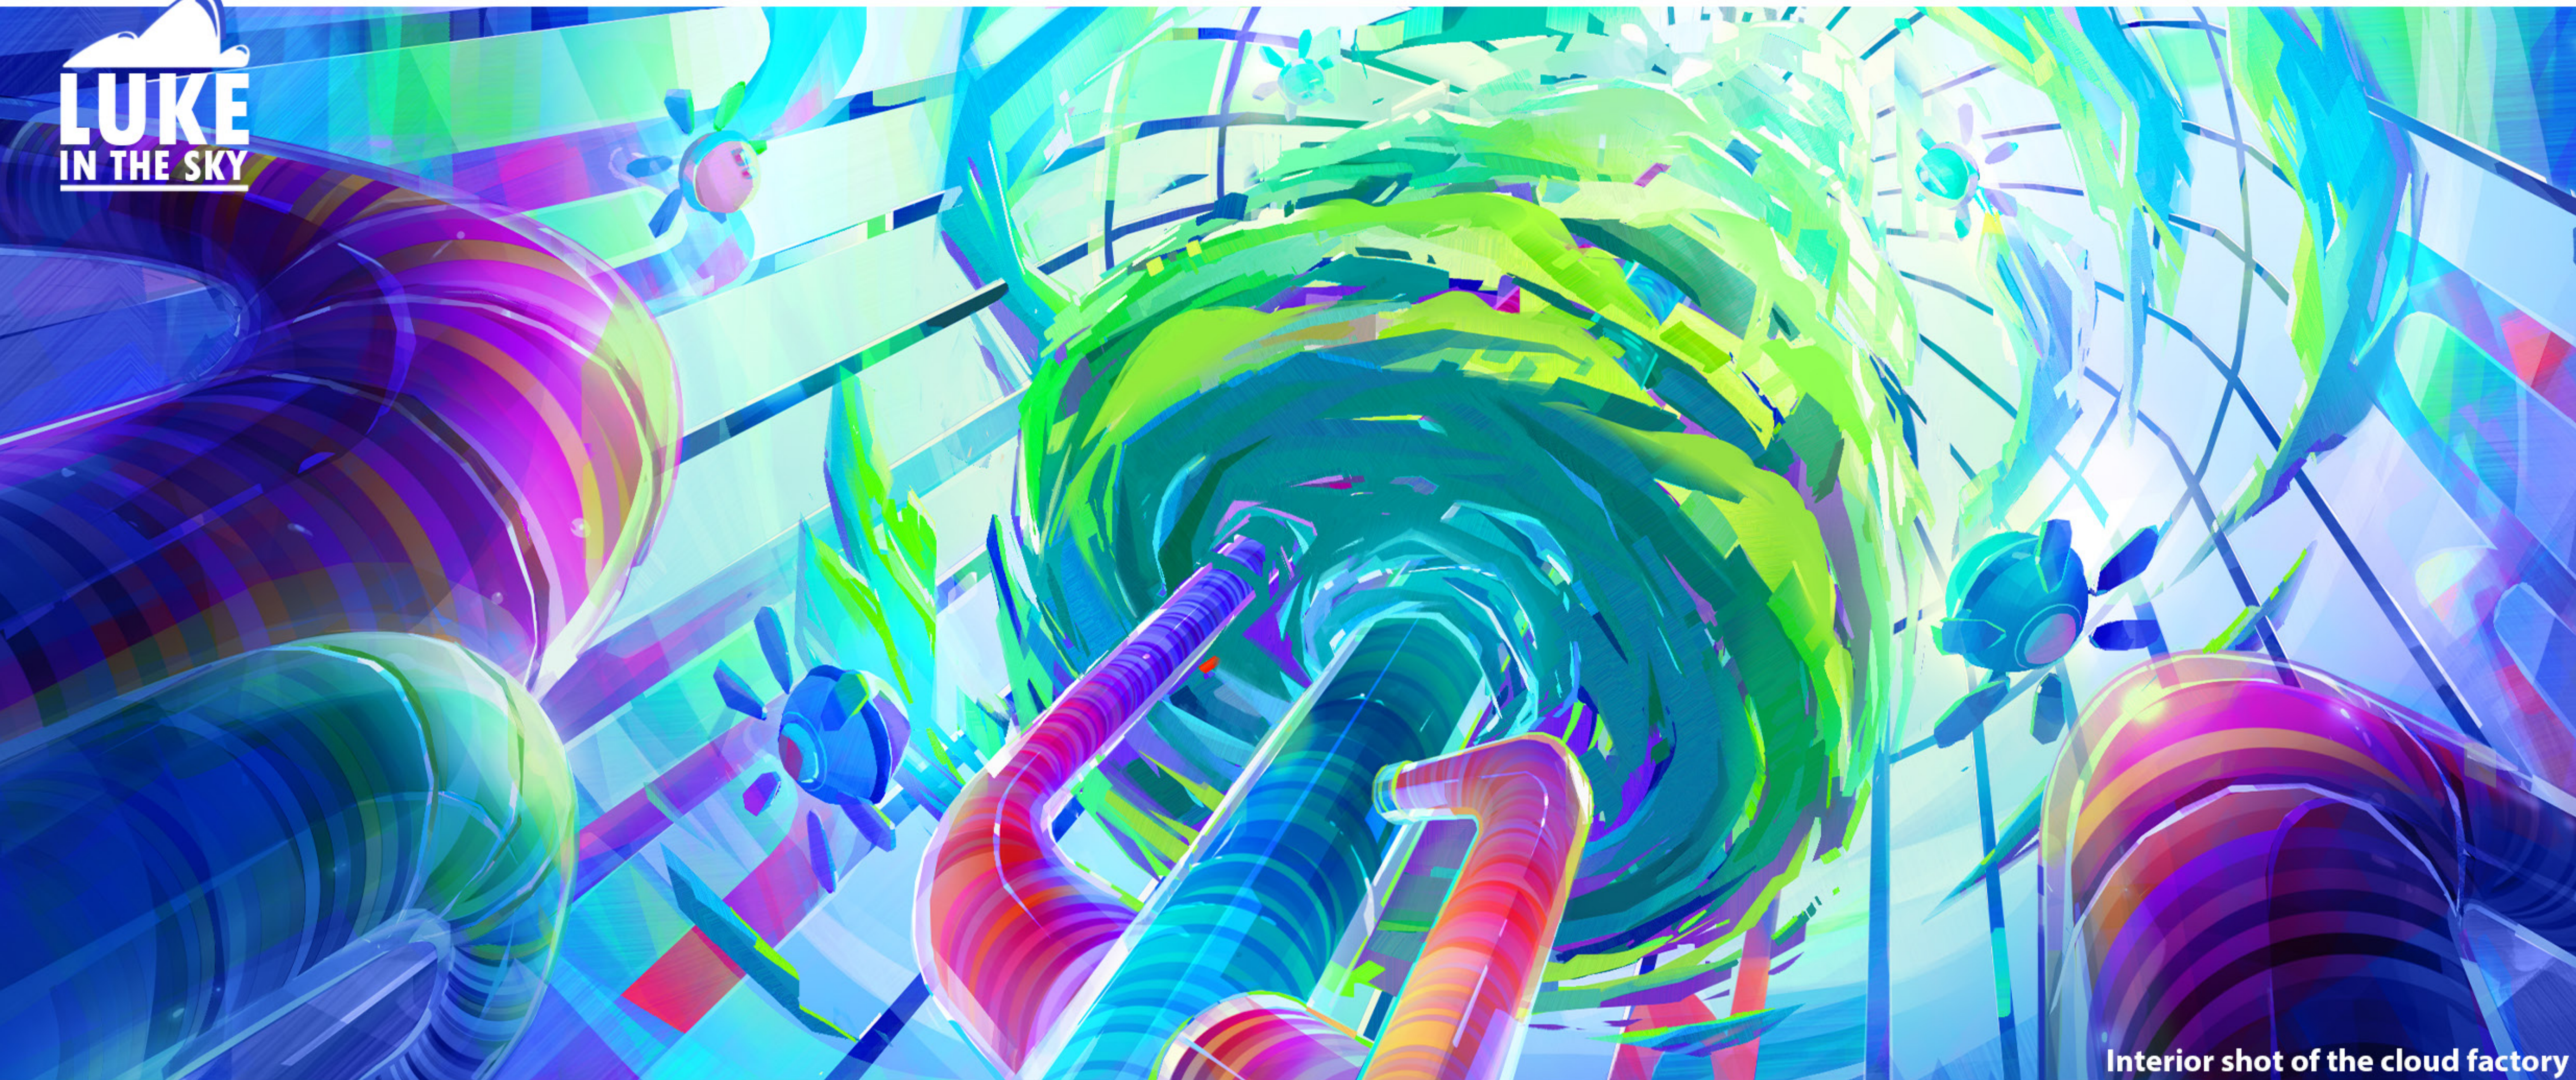

Luke decides to change the inherited formula and create new types of clouds with the help of his robot friends. He uses cloud blender to mix the components together, and when clouds are ready, the robots distribute them using their fans.

FINDING
NEMO
Redesign

A Finding Nemo redesign project, in which I changed all the characters to humans. Nemo is obsessed with everything related to the marine life. He also takes swimming classes in a school where Bruce and Dory work.

AGAFIA THE HERMIT

"Agafia" is a teenage girl who was born into a Russian family. Before she was born her family had to move from Russia to an isolated safe place in the Siberian forest to escape persecution. By time, all her family died except for her elder brother. They lived together for years with their Husky dog that she adopted since it was a puppy.

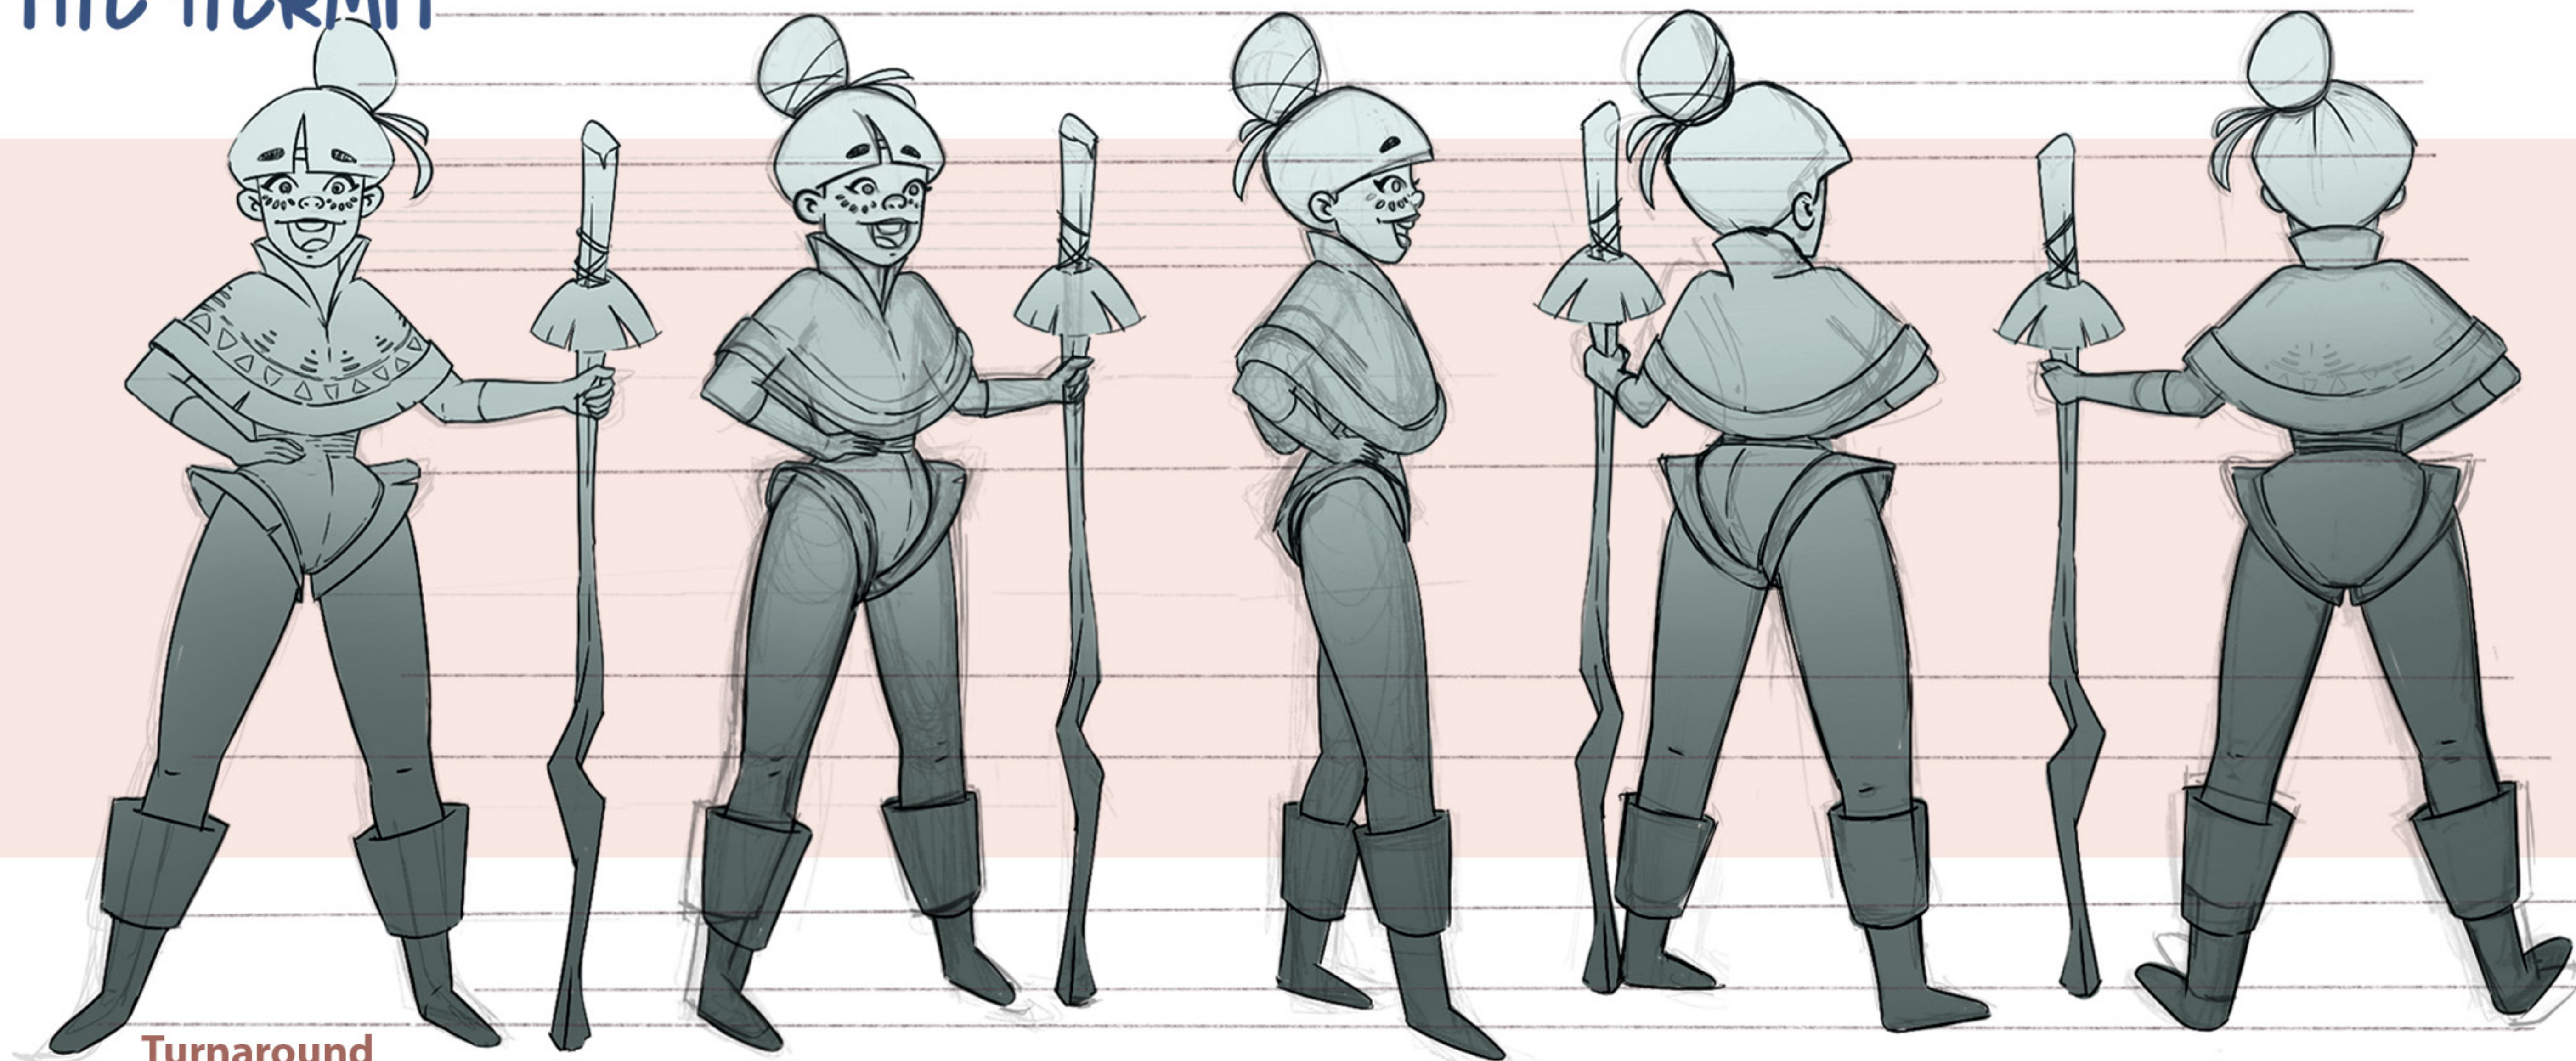

In a stormy day her brother went out to collect some firewood and never came back. Agafia decided to leave the house and start searching for him with the help of her dog who became her only companion.
